### Daily Electricity Supplied and Estimated Demand in Iraq Since January 2004

- Average daily electricity service held steady in the last week (July 12 - 18) at 112,200 megawatt hours (MWh) (above the Summer 2005 goal), despite a drop in peak generation and continued record demand levels.
- Average hours of available power were 14.4 hours in Baghdad and 13.6 nationwide. However, we have received reports that some South-Central governorates (Babil, Najaf and Qadisiyah) are receiving 6-8 hours per day.

## [3.0] Provide Essential Services

### Dead Sea Donors Meeting:

- On July 18, the World Bank announced at the International Reconstruction Fund Facility for Iraq (IRFFI) Donor Committee Meeting in Jordan that up to \$500 million in soft loans will be made available to the Government of Iraq over the next two years to finance development projects in priority sectors.
- This lending package is the first to be extended by the World Bank to Iraq since 1973. The new \$500 million lending package will be used to address Iraq's urgent needs by scaling up activities in sectors where operations financed by the Iraq Trust Fund demonstrate progress in implementation, such as improved school facilities, cleaner and reliable supply of water or better healthcare.

### [3.0] Provide Essential Services – **Water and Sanitation and Telecommunications**

#### Water and Sanitation:

- The Project Contracting Office (PCO) has 83 water treatment projects underway and has completed 61 to date. Under the Accelerated Iraq Reconstruction Program (AIRP), there are a further seven water treatment projects under construction and 43 have been completed. Total water treatment capacity to be added from PCO projects is approximately 1.0 million cubic meters per day.
- USAID's Basic Education program is planning to rebuild water and sanitation facilities in 800 schools. In May, work began on 132 schools, bringing the total number of schools under rehabilitation to 355. Facilities in 11 schools in Maysan governorate have already been completed. The Basic Education program is also leading efforts to reconstruct 70 schools throughout the country.
- Repairs to the sewage collection system in Kadhamiya, a northern suburb of Baghdad with a population of 1.5 million people will be complete in the fall of 2005.
  - To date, 800 meters of sanitary sewage pipe have been installed, and the refurbishment of 11 pumps will continue into early August.

#### Telecommunications:

- The three major cell phone companies in Iraq (Asiacell, Iraqna, and Atheer) continue to enroll new subscribers at healthy rates. As of July 13, there were 2,804,147 active cellular subscribers in Iraq. Landline telephone subscribers in Iraq have also increased to 997,675. Prior to Operation Iraqi Freedom, there were approximately 833,000 landline subscribers.

### [3.0] Provide Essential Services – Health Care

#### Health Care:

- Construction is underway on 142 new primary health care (PHC) facilities across Iraq. Under the AIRP, an additional two PHCs are under construction and eight have been completed.
- A total of 5,098 beds will be distributed to hospitals throughout Iraq between June and December. Once PCO delivers the beds to each governorate, the Director General of each governorate is charged with distributing the equipment to local hospitals based on need.
- Cases of malaria and cholera in Iraq have decreased dramatically, according to the Iraq Ministry of Health Statistics. In 2002, 1,043 malaria cases were reported, dropping to a total of 307 during 2003 and only 86 cases in 2004. In 2002, the total number of cholera cases reported was 423. This figure fell to 192 during 2003 and only 35 in 2004. USAID supported the Iraqi Ministry of Health's (MOH) efforts to combat these diseases by helping make impregnated bed nets more widely available, supporting the Government of Iraq's and UNICEF's efforts to improve water and sanitation conditions for Iraqi households, assisting the MOH in the expansion of health education efforts and improving diarrheal diseases services.
- A USAID contractor conducted a site visit the week of July 11 to the training site in Baghdad, where staff for 150 PHCs, currently under construction throughout Iraq, will be trained to improve their clinical and management skills. Training classes have been completed for 25 physician trainers from six governorates and 17 nurse trainers from three governorates since the end of June. Two more training courses for physicians and nurses are planned for the weeks of July 18 and July 25, respectively.

### [3.0] Provide Essential Services – Education

#### Education:

- A total of 3,065 schools have been rehabilitated to date, and a further 776 are undergoing rehabilitation.
- PCO has completed 643 schools renovations to date and a further 55 are under construction. Under the AIRP, an additional 24 school renovations have been completed and 16 are underway.
  - 840 schools are scheduled for completion by mid-2005. The Mississippi Consortium for International Development (MCID) continued preparations for a second round of the Community Sustainable Outreach Workshop (CSHOP), which includes the award of mini-grant funds for several outreach projects on public health. MCID works with three Iraqi universities in northern Iraq to build capacity in Public Health and Sanitation, with support from USAID's Higher Education and Development program (HEAD).
  - The CSHOP program is essential in establishing community ties to develop sustainable public health outreach programs that will improve the health status of the general public. Seven faculty members - primarily doctors and engineers - from major universities in northern Iraq as well as two civil society organizations will implement projects to develop new nursing and medical practices around the delivery of public health services.
  - In the past, CSHOP mini-grants have funded such projects as "Soybean as Diet Therapy for Diabetics," "Tuberculosis an Endemic Disease in Dohuk; Prevention and Control," and "Promotion of Exclusive Breast Feeding in Dohuk Governorate."
